MO

Oyakhire Michael Kingsley

AI & Backend Engineer · Team lead and lead developer, AtlasBridge

Affiliation	Independent developer, Lagos, Nigeria
Education	B.Sc. Computer Science, National Open University of Nigeria (NOUN)
Contact	kingsmichael.official@gmail.com
Portfolio	kingsmichael.tech github.com/Kingsmichaei
Projects	BursarOS · OyaGo · PathFinder, among others
Skills	Python · FastAPI · Django · SQLAlchemy · PostgreSQL · REST API design · LLM integration · React · Vite · Tailwind CSS · Bootstrap · PWAs · Render deployment · Git/GitHub

Bio

Michael is an AI and backend engineer based in Lagos. He builds production-style web platforms in Python (FastAPI, Django) with PostgreSQL, React front ends, and progressive web apps. His work focuses on software for Nigerian contexts: fintech for schools, transport for Lagos commuters, and tools for students and communities.

Role on AtlasBridge

Michael architected and built the AtlasBridge software:

- **Model serving:** deployed the official N-ATLaS weights on GPU (Kaggle 2× T4) behind an OpenAI-compatible server, with automatic failover to an optional CPU backup (quantised N-ATLaS on llama.cpp).
- **Gateway:** FastAPI service with API keys, rate limiting, streaming, translation, offline language identification, reply-language control, usage logging and a validation report.
- **Developer experience:** Python SDK and CLI, web playground, documentation, and 23 automated tests.
- **Deployment and validation:** Render and Postgres hosting, beta onboarding, and tester coordination.

Team members

KO

Kehinde Joshua Odewole

Brand Designer · Brand identity and visual design, AtlasBridge

Affiliation	Independent designer, Nigeria
Education	Computer Science, Ladoke Akintola University of Technology (LAUTECH), Ogbomoso
Specialism	Full-stack design: UI/UX, graphics and brand identity
Portfolio	behance.net/odewolekehinde linkedin.com/in/kehinde-odewole-817643285
Projects	Memequest · TONYield · Phoenix Liber, among others

Bio

Kehinde is a full-stack designer who creates functional designs (UI/UX and graphics) for products and personal brands. His work focuses on turning casual product visits into engaged, returning users. He reports increasing engagement for the projects and personal brands he has worked with by ten times or more.

Role on AtlasBridge

- **Brand identity:** created the AtlasBridge logo, an "A" and "B" monogram sharing one stem, used across the playground, favicon, documentation and repository.
- **Visual design:** guides the product's look and feel and the developer-facing experience as AtlasBridge grows.

OB

Owoborode Bukunmi Ezekiel

QA Software Engineer · Testing and validation, AtlasBridge

Affiliation	Osun State University (UNIOSUN), Osogbo, Nigeria
Education	B.Sc. Information Technology (undergraduate), UNIOSUN
Specialism	AI and machine learning, IoT and embedded systems
Portfolio	github.com/anonrode
Projects	IPF4WAY (IoT poultry monitoring) · ANONRODE Downloader · Anonrode Video Player, among others

Bio

Bukunmi is an Information Technology student passionate about artificial intelligence, machine learning, the Internet of Things and embedded systems. He builds practical technology solutions to real-world problems, from an IoT poultry-monitoring system that uses cameras, temperature and weight sensors to flag health problems, to ESP32-based embedded projects.

Role on AtlasBridge

- **Testing and validation:** tests the gateway, SDK and playground across languages and supports beta testers.
- **Future voice and edge work:** brings AI and embedded-systems experience to the planned N-ATLaS speech features and low-resource deployments.

N-ATLaS is an initiative of the Federal Ministry of Communications, Innovation and Digital Economy, and powered by Awarri Technologies. AtlasBridge is an independent developer tool built on N-ATLaS.
